

DANIEL VILLARREAL HERNANDEZ

SOFTWARE ENGINEERING

(+52) 6183371209 | 34234 , Victoria de Durango, Durango | danielvillarrealh@gmail.com

Software Engineering student with experience in software development and web technologies, interested in creating practical and well-designed applications.

SKILLS SUMMARY

Core Roles

- Software Development
- Web Development

Frontend Development

- HTML5
- CSS3
- JavaScript
- TypeScript
- React.js
- Next.js
- React Native
- Bootstrap
- Tailwind CSS

Backend Development

- Node.js
- PHP
- Python

Tools & Version Control

- Git
- GitHub
- Postman
- npm

Features & Capabilities

- Responsive and mobile-first design
- Component-based architecture
- REST API consumption and integration
- Database-driven applications
- State and data handling
- Form validation and user interaction flows
- Basic authentication and user management

DEVELOPMENT PROJECTS

Correos Clic — E-commerce Platform (Correos de México)

- Frontend Web Developer
- Contributed to the development of the official e-commerce platform for Correos de México, focused on online product sales and service management.
- Developed frontend features using Next.js and React, applying Tailwind CSS for responsive layouts based on Figma designs.
- Built a component-based architecture with modern UI interactions and animations.
- Collaborated on the integration of e-commerce workflows, including product display and user interaction flows.

Web system, Appointment & E-Commerce Management

- Designed and developed a web-based system for appointment scheduling and service management.
- Implemented an admin panel for product management, order control, and content updates.
- Integrated database-driven workflows for users, services, and product inventory.

Web system, Fitness Tracking & Progress

- Developed a web platform for tracking calorie intake, gym progress, and physical transformations.
- Implemented progress logging through metrics and photo-based records.
- Integrated workout routines and diet plans within a centralized user system

Mobile & Web Applications — React Native / Expo

- Developed mobile applications using React Native and Expo.
- Implemented application logic, data handling, and user interactions.
- Focused on clean architecture, performance, and maintainability.

Chatbot & API Integration

- Developed a chatbot with structured conversational flows.
- Integrated external APIs to automate responses and handle user interactions.
- Managed message logic and basic automation processes.

TECHNICAL EXPERIENCE

HP — Technical Support

- - Diagnosed and resolved hardware and software issues.
- - Performed system maintenance and user support.

Walmart — IT Support Assistant

- - Supported internal systems and equipment configuration.
- - Collaborated with IT teams to resolve incidents.

CERTIFICATIONS

- IT Essentials — Cisco Networking Academy
- Ethical Hacking — Cisco Networking Academy
- Cloud Computing Fundamentals — AWS
- HTML & CSS Essentials — Cisco Networking Academy
- Python Essentials — Cisco Networking Academy

EDUCATION

ADDITIONAL INFORMATION

Universidad Politécnica de Durango (UNIPOLI)

Software Engineering

2022 – Present

Universidad Politécnica de Durango (UNIPOLI)

Networks and Telecommunications

2019 – 2021

- English — B2 (ITEP Core)
- Strong interest in continuous learning and professional growth.
- Experience working on real-world projects and team-based environments.
